INTRODUCTION

In 1889, Daniel G. Brinton and Frederick D. Stone of the Historical Society of Pennsylvania edited the contents of an anonymous MS. in the archives of the Moravian Church at Bethlehem, PA. This, with the additions they incorporated, became "A Lenâpe' - English Dictionary." Their consultant was Rev. Albert Seqaqkind Anthony, himself a Lenape, who was the assistant Missionary to the Delawares and "Six Nations" in Canada. We have published this original work in an effort to aid Arrowmen to better understand the Delaware Indians - those people and their traditions - upon whom our Order was founded. It is the sincere hope of the National Order of the Arrow Committee that this dictionary proves to be a useful reference tool for our members.

Elangomat Waletittin

PREFACE

For about a century, beginning with 1740, Missionaries of the United Brethren, or Moravians, devoted themselves to the conversation and civilization of portions of Lenâpe' or Delaware Indians. These earnest Christian men studied the native tongue, reduced it to writing, and printed it in, for the use of their converts, a number of works of a religious and educational character. The history of their literary activity in this language has been recently traced elsewhere, in detail,* and need not be repeated here. While some of the results appeared in type, much of it remained in manuscript until the curiosity of scientific students led to its publication. Thus, in 1827, Peter S. Duponceau edited the Grammar of Zeisberger, + and sixty years later his English-German-Onondaga-Delaware Dictionary was printed by the private liberality of Professor E.N. Horsford.+

These works of David Zeisberger - whose life found an able and sympathetic narrator in the late Rev. Edmund de Schweintz*-together with his printed "Delaware Spelling Book," were the chief sources from which the later missionaries drew their knowledge of the Lenâpe' dialect; and unquestionably the present Lenâpe'-English Dictionary was founded mainly upon the linguistic work of his proto-Lenâpist. So far as the history of the MS, is concerned, I add nothing the what was stated in "The Lenâpe' and their Legends," which is follows:-

"It is probable the Mr. Dencke was the compiler of the Delaware Dictionary which is preserved in the Moravian Archives at Bethlehem. The MS, is an oblong octavo, in a small, but beautifully clear hand, and comprises about 3700 words. The handwriting is that of Rev. Mr. Kampman, who was a missionary to the Delawares on the Canada Reservation from 1840 to 1842. On inquiring the circumstances connected with the MS., he stated to me that it was written at the period named, and was a copy of some other work, probably by Mr. Dencke; but of this he was not certain."+

The Rev. C.F. Dencke, here alluded to, was missionary to the Delawares at New Fairfield, Canada, for a number of years after the war of 1812. He was the author of a grammar of the tongue, now apparently lost, * and translated into various portions of the New Testament. His death took place in 1839.

* The Lenâpe' and their Legends; by D. G. Brinton, pp. 74-109 (Philadelphia, 1885)

+ A Grammar of the Language of the Lenni LENÂPE', in the Transactions of the American Philosophical Society, 1827.

+ Zeisberger's Indian Dictionary, 410, Cambridge, 1887.

* Life and Times of David Zeisberger (Philadelphia, 1871), This eminent Bishop of the Moravian Church died suddenly while present work was passing through the press - a loss keenly felt throughout the respected Christian body and by a large circle of personal and literary friends beyond its limits.

* A small portion of it contained in some MSS, now on the possession of the Pennsylvania Historical Society.

Lenâpe' to English Dictionary

The MS. Of Mr. Krampman was carefully copied and enlarged by the addition of words from the MSS, and printed works of Zeisberger, Heckewelder and Ettwein. These additions have, in the printed copied, been indicated by the capital letters, Z., E., and H. In this condition the MS. Was submitted to the Rev. Albert Seqaqkind Anthony, a born Lenâpe', and perfectly familiar with the language of his nation as spoken by the colony of it resident of the Six Nations Reservation, in Ontario, Candana. In this colony, the usual dialect is the Minsi, and, as its members belong to a portion of the nation who were converted by Missionaries on the English Church (to which Mr. Anthony belongs), the theological terms developed usually differ widely from those framed by the Moravians.

Mr. Anthony left the MS. By him for some months, giving its contents careful attention, and subsequently to editors met and passed in review every word in the Dictionary. The numerous notes and corrections in brackets, with an appended capital A., are the emendations suggested by Mr. Anthony from the dialect of his ancestral sub-tribe. The latter differs somewhat from that employed by the compiler of the Dictionary. The grammatical forms employed indicate that this was the Unami (Wonami).

No attempt has been made to increase the lexicography by the insertion of words or forms obtained from the Delaware of to day. All such, when mentioned, are by way of comparison only. It would have been easy to have extended the vocabulary. There are evidently some Lenâpe' radicals and many themes which do not appear in this work. But the editors confined their efforts to presenting this work as exclusively concerned with the dialect as employed by the Moravian Missionaries; and hence, all additions to the vocabulary have been from their writings.

As is well known, the early Movavians were exclusively Germans; and in reducing the Lenâpe' to a written idiom they made use of the German alphabet, without adding to it any phonetic signs. This alphabet was not ill adapted for the purpose. It could represent the gutturals and the vowel sounds of the Lenâpe' with sufficient clearness. But there were a few sounds, and these frequent and important ones, which their Germanic ears did not differentiate.

The most prominent of these is the soft th, as is with. This is usually represented in the Dictionary by s. The true sibilant I, in reality, very rare; it scarcely exists. The soft th again appears where ever the Dictionary has an x; the properly k'th.

The H is not a true aspirate, as in German, but rather a pause, as in the french L Hollande.

The terminal K is a strong, suddenly checked expiration, which is by some writers not ineptly expressed by q' or q! Instead of the k, the Dictionary sometimes employs que, which appears to be identical in sound.

The liable b is very like a p, and probably alternates with it in the dialects.

The g is always hard, like the English K; the j has the value of the English y; the compound ey is like the long I in pine; the syllables gan and quan are pronounced alike; and the diphthong eu has, at least in the Minsi of today, the value of o in note.

By observing these points and giving the remainder of the alphabet the German values, I had no difficulty in reading Dencke's translation of the Epistles of St. John to Mr. Anthony with such correctness that he understood it at once.

D. G. Brinton

Lenâpe' to English Dictionary

A

- A, indeed, well.
 Aan, to go: (aal, in *Minsi*, A.)
 Abtschi, Always: *-likhqui*, at all times.
